BoCan as
Plastic Packaging Engineers

Design of injection moulded plastic containers

As designers and engineers with more than 30 years of experience, we can help you make your Plastic Containers.

We assess your needs as packaging manufacturer and apply our long skills from different markets and countries to set up your products and operations according to your customer requirements.

Get carried away in our buckets!

BoCan activity initiated in 1987 after the founder sold in Denmark and UK a license to produce a plastic container patented design. From foundation, several licenses to utilize packaging inventions have been granted in many parts of the world.

Nowadays BoCan is a 30 years experienced Danish company working as specialist in designing a wide assortment of injection moulded plastic containers and helping producers to industrialize and market our designs.

BoCan takes an overall look at your needs as packaging manufacturer, and apply our long time experience from many markets to **tailor make** your products and operations to your customer requirements.

Beside our product design job, BoCan offers **engineering advising** about all subjects relating to plastic buckets manufacturing (machinery, factory lay-out, training in process, trouble shooting to ensure a smooth production, printing and decoration, raw materials, project budgeting, production control and specification, etc.).

On top of that BoCan can also offer a powerful know-how in the design of moulds for plastic containers. We can take on the responsibility to build up high quality, reliable and fast **packaging moulds** at competitive prices.

Services

01_Project verification

Let us help you to identify the market needs and tailor make your products and the project to match your requirements. We will also support you with the project budget and timeline as well as describe the organization necessities.

02_Product design

Emphasize this job will take you to success. Standard and patented product designs. You will always find the one which perform your expectation. And we will tailor make it to become a business achievement.

03_Industrial engineering

A powerful know-how in mould design and manufacture enable you to integrate the product design and its industrialization in one hand. Think ahead the products to make the production effortless. We also advice you on the acquisition of suitable machinery.

04_Start-up and support

BoCan is beside you when you start-up and launch production. We can train your staff in process understanding, set up your quality control procedures, polymer best selection, help you with further improvements and assist your production management.

We support you with the industrialization of our designs

Mould design & tooling

Design and manufacture of fast and durable moulds for plastic packaging

Training and advisory

Theoretical and practical teaching till your staff performs a reliable process.

Special BoCan equipments

Auxiliary machines and devices to make your process easier and trusted.

Product Families

In our wide product design portfolio you can find the container that suits your market needs.

From light weight thin pails for food up to heavy duty ones for UN transportation among many others... we design plastic buckets for your profit!

Contact our experts to know more details about one of the below designs.

BoCan

Special patented technology. Inspired in the metal straight cans. Fully decorable, suitable for paint.

BoCan Alternative Lids

1 Easy open lever pilfer evidence.
2 Tinting spout lid for mixing systems.

BoTainer

Triple lock closure profile. Peel-off band tamper evidence. Optional side handles for big sizes.

CylTainer*

Straight bucket with pilfer evidence. Suitable for paint mixing systems. Easy opening feature.

DanTainer*

Secure inner closure profile. Suits paint and food markets. Easy opening tamper evidence flap.

LeverTainer*

Overcup standard lid. Lever for friendly opening. Tamper evidence.

LeverTainer Alternative Lid*

Lid for thermosealed levertainers. Designed for food high barrier preservation.

SuperPail UN

Heavy duty high performance pail to match UN standards. Available in hdpe and pp.

OvalTainer*

Overcup or inner closure profiles. Oval shaped and pilfer evidence. Gasket free water tight.

PlumeTainer*

Light weight container. Overcup lid with tamper evidence. Suitable for food, solids and paint.

Peeloff SuperPail

High performance heavy duty pail. Tear-off band for easy opening. Reclosable for industrial uses.

QuadTainer

Rectangular or squared container. Designed for paint. Special roller grid design available.

FlipTop QuadTainer

Suitable for paint market. Friendly ready to use concept. Lever opening and tinting spout.

RhinoTainer

Inner closure multi lock profile. Heavy duty high performance pail. Suits lube, chemicals and paints.

RhinoEvo

An innovative closure profile for extreme uses. Heavy duty container for chemicals.

Saturn Pail

Standard saturn-rings container. Commonly used worldwide. Heavy and medium weight.

SuperPail Doublelock

Heavy duty pail for paint and chemicals. Tear-off band double lock closure.

* Also available in **light weight thin wall** version.
